...and take a look at more new products we've been busy developing!

Surface to Surface has now added more speed and efficiency to our mixing units.

We have now combined our patented shearing/mixing technology with a modified Gorman Rupp® pump to all of our mixing units, to deliver more performance that our customers enjoy.

- ◆ 47% more fluid passing through the nozzle, shear and tank jet guns on the 3" systems. 193 gpm. @ 35 psi.
- ◆ 26% more fluid passing through the nozzle, shear and tank jet guns on the 4" systems. 300 gpm. @ 35 psi.
- ◆ Increase in discharge flow and pressure.
- ◆ Internal wear ring in front of the impeller.
Handles abrasion better and is easily replaceable.
- ◆ Grease type mechanical seal.
Less prone to damage from heat and abrasion.
- ◆ Larger drain and priming ports.
- ◆ A pump that is distributed around the world

Talk to us about how you can retro-fit our new pump onto your existing Surface to Surface mixer so you can enjoy all of these benefits

Outstanding Quality with a
MONEY BACK GUARANTEE!
