

The universal mixers designed by STS are adaptable to most shapes and sizes of tanks, whether it's your own tank, or one of ours.

M-3 series

- agitate and mix at the same time.
- 100 gpm @ 32psi roaring thru the nozzle into mixing tee.
- over 300gpm rolling the tank internally.
- over 100gpm feed to the rig or another tank.
- available with hydraulic, electric, diesel, or gasoline drive.

RTK-300

The M3 series mixers use a 3" pump and are suitable for most tanks* up to 1000gal.

The M4 series mixers use a 4" pump and are suitable for 750 to 1500gal. and some larger tanks*.

RTK-750

M-4 series

- agitate and mix at the same time.
- 200 @ 36psi roaring thru the nozzle into mixing tee.
- over 580gpm rolling the tank internally.
- over 250gpm feed to the rig or another tank.
- available with hydraulic, electric, diesel, or gasoline drive.

RTK-1200

* Tank volume and shape reflect the ability to mix and agitate properly.
 Mixers come complete with properly sized jet guns, and NPT thread connections.
 Connecting hoses NOT supplied.

Use the patented mixing ability of StS to retrofit that old mixer of yours that doesn't quite measure up.
